

1999 HOUSE VOTE DESCRIPTIONS

1. TRADE / STEEL — (H.R. 975) In 1998, as result of a slumping global steel market, foreign steel producers began illegally dumping steel in the United States. Imports jumped 33 percent and some 10,000 steelworkers lost their jobs. H.R. 975 called for a reduction in volume of steel imports, set tougher import monitoring rules and set an import limit at 1997 levels. The bill passed 289-141, March 17, 1999. **Y=R N=W** (DEM: 197-13; REP: 91-128)

2. SOCIAL SECURITY / MEDICARE—(H.C.R. 68) Given the chance to strengthen Social Security and Medicare or to finance an \$800 billion tax cut aimed predominately at the wealthy, the House voted, mostly along party lines, for an FY 2000 budget resolution that set tax cut legislation in motion but did not extend the life of Social Security or Medicare by a single day. The bill passed 221-208 on March 25, 1999. Budget resolutions are budget “blueprints” and are not signed into law. **Y=W N=R** (DEM: 4-205; REP: 217-2)

3. TRADE / AFRICA—(H.R. 434) Working families have long supported fair trade polices that include worker and environmental protections and provide economic benefits to workers in the trading nations. But H.R. 434, which authorized a new trade and investment policy for sub-Sahara Africa, did not include enforceable worker protections and would allow transshipments of foreign textiles and apparels through African countries, giving other nations the trade benefits intended for African nations. It also did nothing to address one of the major problems the sub-Saharan countries face, a crushing debt burden to developed nations. The bill passed 234-163, July 16, 1999. The bill was sent to conference with a similar Senate bill and no further action was taken in 1999. **Y=W N=R** (DEM: 98-99; REP: 136-63)

4. EDUCATION / BLOCK GRANTS—(H.R. 1995) Overcrowded and rundown schools make it difficult for teachers to teach and students to learn. President Clinton proposed a class size reduction program centering on the hiring of 100,000 new teachers over the next six years to reduce class size in the early grades to a national average of 18 students. However, H.R.1995 actually undermines student achievement by block-granting the class size reduction program, along with other programs, and not requiring those block grants to target the neediest schools where the funds would have the most impact. The bill passed 239-185, July 20, 1999. **Y=W N=R** (DEM: 24-180; REP: 215-4)

5. TAX CUTS—(H.R. 2488) The nation’s growing budget surplus provided a great opportunity for Congress to pass legislation to strengthen Social Security and Medicare, add prescription drug coverage to Medicare and still provide working families with targeted tax relief. Instead, H.R. 2488 called for a \$792 billion, 10-year tax-cut package with most of its benefits intended for the wealthy—such as a capital gains tax cut and estate tax repeal. Estimates showed the cost of the bill could balloon to \$3 trillion for the 10 years following 2010, just as baby boomers’ retirement is straining Medicare and Social Security. The bill passed 223-208, July 22, 1999. It was later vetoed by President Clinton. **Y=W N=R** (DEM: 6-203; REP: 217-4)

6. CHINA / NTR—(H.J.RES. 57) The Chinese government has a long history of abuse of workers and human rights and the production of export goods made by forced labor. H.J. Res. 57 would have denied the extension of normal trade relations with China, which many opposed because of the Chinese government's horrendous record of human and workers' rights' violations, the ballooning trade imbalance and China's continued use of slave labor. However, the resolution failed 170-260, July 27, 1999. **Y=R N=W** (DEM: 98-110; REP: 71-150)

7. WORKER HEALTH / ERGONOMICS —(H.R. 987) Every year, more than 600,000 workers suffer injuries and illnesses caused by ergonomic hazards in the workplace. The National Academy of Sciences, the National Institute of Occupational Safety and Health, most occupational safety and health organizations and professionals say scientific evidence backs the need for workplace ergonomic standards. H.R. 987 would prohibit OSHA from issuing an ergonomics standard until yet another scientific review is completed, about two years. The legislation had strong backing from the Chamber of Commerce and other business groups. The bill passed 217-209, Aug. 3, 1999. **Y=W N=R** (DEM: 15-191; REP: 202-17)

8. HEALTH CARE / PATIENTS' BILL OF RIGHTS —(H.R.2723) Starting in 1998, working families called for a strong Patients' Bill of Rights to ensure their rights to have treatment decisions made by doctors and not insurance company bureaucrats, to see specialists when needed, to get emergency room care when and where needed, to appeal health care decisions and to hold managed care companies accountable when they wrongly deny patients care. H.R. 2723 provided those rights and also required health plans to provide customers with options such as ob-gyn care for women and pediatricians as primary care providers for children. The bill passed 275-151, Oct.7, 1999. **Y=R N=W** (DEM: 206-2; REP: 68-149)

9. EDUCATION / SCHOOL VOUCHERS—(H.R.2) Private school vouchers take away public funds from public schools, which are open to all students, and shift them to private schools, which can exclude students for several reasons. During debate on H.R. 2, the Student Results Act, Rep. Richard Armey (R-Texas) offered an amendment that would have allowed states to use \$100 million in Title I funds for private school vouchers. The amendment was rejected 166-257, Oct. 21, 1999. **Y=W N=R** (DEM: 3-204; REP: 163-52; I: 0-1)

1999 SENATE VOTE DESCRIPTIONS

1. EDUCATION—(S. 280) Overcrowded schools make it difficult for teachers to teach and students to learn. Studies show that smaller class sizes help improve student achievement. President Clinton proposed a class size reduction program centering on the hiring of 100,000 new teachers over six years. Sen. Patty Murray (D-Wash.) offered an amendment to S. 280 that would have helped reduce class sizes across the country, by authorizing funds to help local school districts recruit, hire and train those 100,000 new teachers. But the Senate failed to act when it tabled the measure in a 55-44 vote March 3, 1999. **Y=W N=R** (DEM: 0-44; REP: 55-0)

2. SOCIAL SECURITY / MEDICARE—(S. CON. RES. 20) The nation's growing budget surplus provided a great opportunity for Congress to pass legislation to strengthen Social Security and Medicare and add prescription drug coverage to Medicare. During consideration of the Senate's FY 2000 budget resolution, the Senate rejected an amendment by Sen. Kent Conrad (D-N.D.) that would have saved the budget surplus to extend the solvency of the Social Security and Medicare trust funds. The measure failed 45-54 March 24, 1999. **Y=R N=W** (DEM: 45-0; REP: 0-54)

3. TRADE / STEEL—(H.R. 975) As a result of a depressed world steel market, foreign steel producers began illegally dumping steel in the United States. In 1998, imports jumped 33 percent and some 10,000 steelworkers lost their jobs. The House overwhelmingly passed a bipartisan bill that called for the reduction in steel imports, established tougher import monitoring and imposed limits that returned foreign steel imports to 1997 levels. But Senate opponents filibustered against even considering the bill and the bill's backers, by a 42-57 vote June 22, 1999, could not overcome the filibuster. **Y=R N=W** (DEM: 27-18; REP: 15-39)

4. PATIENTS' BILL OF RIGHTS—(S. 1344) In a major grassroots campaign, working families called for a strong Patients' Bill of Rights. The *real* Patients' Bill of Rights ensures the right to have treatment decisions made by doctors and not insurance company bureaucrats, to see specialists when needed, to get emergency room care when and where needed, to appeal health care decisions and to hold managed care companies accountable when they wrongly deny patients care. But the Senate passed a managed care bill that excluded more than 100 million Americans, gave health plans the final say on medical treatment decisions and lacked important comprehensive patient protections such as patient advocacy language, access to specialist and clinical trials, continuity of care and an adequate provider network. It passed 53-47, July 15, 1999. **Y=W N=R** (DEM: 0-45; REP: 53-2)

5. TAX CUTS FOR THE WEALTHY—(S. 1429) Working families believed that the nation's huge budget surplus should be used to strengthen Social Security and Medicare, add prescription drug coverage to Medicare and provide middle-class tax relief. Instead, the Senate passed S. 1429, which would have spent money essential to Medicare reform and a prescription drug benefit, given 76 percent of tax cut benefits to the wealthiest 20 percent of taxpayers, assumed devastating cuts in discretionary programs like education and cost \$2 trillion in its second decade (2010-2019) just as baby boomers' retirement would begin to strain Medicare and Social Security. The bill passed 57-43, July 30, 1999. After a House/Senate conference, the final version was vetoed by President Clinton. **Y=W N=R** (DEM: 4-41; REP: 52-2)

6. NLRB / FUNDING—(S. 1650) Big business and its congressional cronies have sought to gut important worker initiative programs such as the Occupational Safety and Health Administration, the Fair Labor Standards Act and the National Labor Relations Board. In 1999, corporate allies went after the NLRB with an amendment that would have slashed funding by \$25.5 million. The Senate passed a motion to table, or kill, the measure 50-49, Sept. 30, 1999. **Y=R N=W** (DEM: 45-01; REP: 5-48)

7. DAVIS-BACON— PREVAILING WAGE—(S. 1650) The Davis-Bacon Act ensures that workers on federal construction projects receive the local prevailing wage. This prevents contractors from slashing wages in order to win federal contracts with low-ball bids. During consideration of the FY 2000 Labor/Health and Human Services/Education appropriations bill, Sen. Bob Smith (R-N.H.) offered an amendment to prohibit applying Davis-Bacon in declared federal disaster areas. A motion to table the amendment passed 59-40, Oct. 7, 1999. **Y=R N=R** (DEM: 44-0; REP: 15-49)

8. TRADE / AFRICA—CARIBBEAN BASIN INITIATIVE—(H.R. 434) Trade policies should include worker and environmental protections and provide economic benefits to workers. But H.R. 434, which the Senate amended to include Caribbean Basin Initiative nations, authorized a new trade and investment policy for sub-Saharan Africa without enforceable worker protections and extended NAFTA to CBI countries. It also allowed transshipments of foreign textiles and apparels through African countries, giving other nations the trade benefits intended for African nations. It also did nothing to address one of the major problems the sub-Saharan countries face, a crushing debt burden to developed nations. The Senate passed its version of H.R.434 76-13, Nov. 3, 1999. The bill was sent to conference and no further action was taken in 1999. **Y=W N=R** (DEM: 30-13; REP: 46-6)

9. MINIMUM WAGE—(S. 625) The national economy is stronger than it's been in a generation and unemployment is at a three-decade low, but today's minimum wage is too meager to keep even a small family out of poverty. Working families supported an amendment by Sen. Ted Kennedy (D-Mass.) that would have increased the minimum wage by \$1 an hour over two years, to \$5.65 an hour beginning Jan. 1, 2000, and \$6.15 an hour beginning Jan. 1, 2001. Senate Republican leaders were able to defeat that amendment to bankruptcy legislation and instead approved an amendment to raise the minimum wage by \$1 an hour over three years. But the amendment also included excessive tax breaks for the wealthy—worth more than \$75.3 billion over 10 years. The amendment passed on a vote of 54-44, Nov. 9, 1999. **Y=W N=R** (DEM: 1-43; REP: 53-1)
